

# Large battery storage station

## Overview

---

What is the largest grid-side energy storage station in China?

After completion, the project is expected to stand as the largest grid-side energy storage station in China. Tesla's statement noted that its Shanghai battery plant produced more than 100 Megapacks during the first quarter of this year. Each Megapack is capable of delivering up to one megawatt of electricity for four hours.

Will Tesla build China's largest grid-side battery storage plant?

Tesla will build China's largest grid-side battery storage plant in Shanghai. The \$556 million project, involving over 100 Megapacks, aims to stabilize China's urban power grid. Tesla's energy expansion in China comes as demand for large-scale battery systems grows.

Where is Tesla building a battery storage facility?

Plus Power's Gambit Energy Storage in Angleton, Texas. Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a significant step in the U.S. automaker's global energy strategy.

Why is Tesla building a battery storage facility in China?

Tesla's energy expansion in China comes as demand for large-scale battery systems grows. Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a major step in the company's global energy ambitions despite ongoing trade tensions between Washington and Beijing.
