

# Large cell solar container lithium battery pack production

## Overview

---

Are large capacity battery cells ready to go beyond 300 Ah+?

Demand for large capacity cells continues to grow at a steady pace, and major manufacturers are readying to go beyond the common 300 Ah+ format. China's EVE Energy is set to become the first battery cell manufacturer to mass-produce lithium iron phosphate (LFP) battery cells with more than 600 Ah capacity for stationary storage applications.

When will Eve big battery & giant energy storage systems come out?

Mr. Big battery cells and Mr. Giant energy storage systems were officially released in January and scheduled for mass production in October and November, respectively. Now, EVE has confirmed that the large-capacity cell will enter mass production in December this year and roll off its production lines in Jingmen, China.

How does Eve Energy support the mass production of Mr Big's battery cells?

To support the mass production of Mr. Big's large battery cells, EVE Energy is committed to building a world-class super energy storage plant. It has established a virtual factory leveraging digital twin technology, creating a super intelligent factory that integrates automation, digitization, and low-carbon processes.

What are the advantages of large-capacity battery cells?

The advantages of large-capacity battery cells lie in their ability to reduce the cost and integration complexity of energy storage systems, improve energy density and safety, and reduce the use of components in the PACK stage, thus simplifying the assembly process and further lowering costs.

## Large cell solar container lithium battery pack production
