

Latest price of uninterruptible power supply cabinet

Overview

What are Uninterruptible Power Supplies (UPS)?

Uninterruptible power supplies (UPS) are devices that allow machines to keep their field power supplies, programmable logic controllers (PLCs), and communications devices functioning during an unexpected outage. They offer a means of achieving this.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.
