

Lesotho Energy Storage Investment Project

Overview

Lesotho aims to increase generation capacity through a hydropower scheme where pre-feasibility study on the 1,200 MW pumped-storage project has shown promising results. What is the energy sector like in Lesotho?

The energy sector in Lesotho is characterised by an enormous potential of renewable energy resources. Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1.

What is the energy potential of Lesotho?

Clearly, Lesotho possesses significant renewable energy potential in hydro, solar and wind. On hydropower alone, due to its abundant water resources, the hydropower generation potential is approximately 450 MW. Solar PV and.

Can Lesotho produce electricity?

Lesotho has the potential to produce up to 6,000 MW from wind and solar, 4,000 MW from pump storage, 400 MW from conventional hydropower, and more than 1,000 MW from hydropower. However, the current demand for electricity continues to exceed.

Does Lesotho have a 'least cost power development plan'?

The Government of Lesotho through the support of the World Bank has just concluded a Least Cost Power Development Plan which recommends among other aspects the priority and least-cost generation and energy storage projects for permutations of scenarios; national and trade opt
