

Light truck RV with 3 kW solar

Overview

How does a solar RV work?

Coupled with up to 3 kW of solar power, the RV can power the living needs of its occupants and eliminates the reliance on propane and other fossil fuels. An ecosystem of all-electric appliances, connected features, and modern amenities for a seamless camping experience.

Does lightship have an electric RV trailer?

Lightship starts producing its electric RV trailer, which features a battery to help propel the tow vehicle and power other amenities. The TrekDrive system can double the range of the tow vehicle if it's electric, or double its mpg if it's ICE-driven, the company says. The RV is offered in 44- and 77-kWh versions, and also features solar panels.

Will a 77 kWh battery power a 2025 RV trailer?

Traveling the country in the year 2025 is finally as futuristic as we imagined it, with a 77-kWh battery on board. Lightship starts producing its electric RV trailer, which features a battery to help propel the tow vehicle and power other amenities.

Can EVs tow a lightship RV?

It remains to be seen whether the Lightship RV, as futuristic as it seems, will find a large enough audience among RV owners who will use EVs to tow the trailer, but it's nice that it can provide extra power to internal-combustion-engined vehicles as well.
