## Overview

Can Lithium Werks provide a battery management system (BMS)?

Lithium Werks can provide modules and packs with BMS (Battery Management Systems) to monitor, control and communicate with your devices or configure the modules to accept off-the-shelf BMS products. Lithium Werks builds custom battery packs and modules using lithium iron phosphate LFP batteries.

Are lithium iron phosphate batteries safe?

Most importantly, to design a safe, stable, and higher-performing lithium iron phosphate battery, you must test your BMS designs early and often, and pay special attention to these common issues. Every lithium-ion battery can be safe if the BMS is well-designed, the battery is well-manufactured, and the operator is well-trained.

What is the best BMS for lithium & LiFePO4 batteries?

Choosing the best BMS for lithium and LiFePO4 batteries can be a challenge if you are not familiar with all the terms and with so many brands on the market that all claim to be the best. JK BMS, JBD Smart BMS, and DALY BMS are the best BMS makers out there, but this article reveals that there are levels to that, too.

Why do lithium-ion-phosphate batteries need a battery management system?

Learn why Lithium-ion-phosphate batteries need the right battery-management system to maximize their useful life. It's all about chemistry. Lithium-ion (Li-ion) batteries provide high energy density, low weight, and long run times. Today, they're in portable designs.
