

# **Lithium iron phosphate battery energy storage container installation in West Africa**

## Overview

---

What is a 1 MWh lithium-ion battery storage system?

The 1 MWh lithium-ion battery storage system, BMS, energy storage monitoring system, air conditioning system, fire protection system, and power distribution system are centrally installed in a special box to achieve highly integrated, large-capacity, and mobile energy storage equipment.

What is a containerized energy storage system?

Containerized energy storage system uses a lithium phosphate battery as the energy carrier to charge and discharge through PCS, realizing multiple energy exchanges with the power system and connecting to multiple power supply modes, such as photovoltaic array, wind energy, power grid, and other energy storage systems.

What is containerized battery energy storage system (cbess)?

Containerized Battery Energy Storage System (CBESS) is an important support for future power grid development, which can effectively improve the stability, reliability, and power quality of the power system.

What is the core technology of battery energy storage system?

The battery energy storage system includes a lifepo4 battery pack, lifepo4 BMS, energy conversion system, control system, and other equipment. Among them, the core technology is the structure design of the lifepo4 pack, the thermal design of the battery system, the protection technology of the battery system, BMS, etc.

## Lithium iron phosphate battery energy storage container installation
