

Ljubljana Foldable Container Off-Grid Type

Overview

The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically. What are containerized mobile foldable solar panels?

Containerized mobile foldable solar panels are an innovative solar power generation solution that combines the mobility of containers with the portability of foldable solar panels, providing flexible and efficient power support for a variety of application scenarios.

What is an off-grid Solar System?

(coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container – not hooked up to the power grid and working completely autarkically. The system provides up to 80kW of discharge power and supplies plugged-in consumers with power – even when the sun doesn't.

What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.
