

# **London 5g solar container communication station solar power generation system project**

## Overview

---

Can a solar farm connect to the London Underground?

Transport for London (TfL) is seeking a delivery partner to work collaboratively to develop purpose-built solar farms to connect to the London Underground network, with opportunities for a broader connection to TfL's estate. Bidders are invited to participate in a competitive tender, which opens from 31 October.

Is London's Green heartbeat unlocking new ways to make energy greener?

Lilli Matson, TfL's Chief Safety Health Environment Officer, said: "As London's strong, green heartbeat, we're unlocking new ways to make our network and the energy we consume greener.

What is the TFL solar project?

The project will explore developing and connecting solar infrastructure near the TfL network, facilitating development of assets at scale, contributing to the wider ambition to use 100 per cent renewable source electricity across TfL's operations by 2030.

Why is TfL bringing forward large-scale solar?

Rollo Maschietto, Interim Head of Power at the REA (Renewable Energy Association), said: "This is exactly the kind of leadership we need from major public bodies to unlock investment in clean energy infrastructure. TfL is helping to bring forward large-scale UK solar - the cheapest and quickest form of new electricity generation.
