

London container generator manufacturer

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

What is an ISO containerise generator unit?

A 'standard' ISO containerise generator unit denotes an installation where the original lifting points and dimensions of the intermodal container are left unchanged.
