

# **MW-class containerized solar container energy storage system**

## Overview

---

What is mw-class containerized battery energy storage system?

A MW-class containerized battery energy storage system (CBESS) is an important support for future power grid development, which can effectively improve power systems' stability, reliability, and power quality.

What is mw-level container energy storage system?

An MW-level container energy storage system consists of the battery system and energy conversion system. The battery system contains advanced lithium iron phosphate modules, battery management system, and DC short circuit protection and circuit isolation fuse switch, all centrally installed in the container.

What is a containerised energy storage system (BESS)?

They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes.

What is a 2MW energy storage system?

2MW energy storage system is currently in the process of being commissioned on the Orkney Islands, where wind power, wave power and tidal power plants are part of the energy supply mix and power is exported to or imported from the British mainland through 33kV submarine cables.
