

Manila Wind and Solar Energy Storage Power Station

Overview

What is a GW power plant in the Philippines?

Strategically located in the Philippines, the comprehensive development is designed to harness substantial renewable energy resources, boasting a total planned capacity of 3.5 gigawatts (GW) of photovoltaic (PV) power and 4.5 gigawatt-hours (GWh) of energy storage.

Will Terra become the largest integrated photovoltaic power station in Southeast Asia?

This project marks a significant milestone as Terra is poised to become the largest integrated photovoltaic and energy storage power station in Southeast Asia.

How much solar power does the Philippines have in 2024?

As of November 2024, solar power capacity in the Philippines reached 2,551 MW, or 8.6 percent of the total 26,697 MW installed capacity across all technologies, with energy storage systems reaching 634 MW and rooftop solar installations for own-use at 116 MW.

What is Phase 1 of PV & energy storage?

The Phase I project, which was recently contracted, encompasses 1.4 GW of PV capacity and 3.3 GWh of energy storage capacity. Construction activities are scheduled to commence in November 2024, with the facility expected to enter commercial operation by 2026.
