Are monocrystalline solar panels a good choice?

Monocrystalline solar panels are champions when it comes to solar efficiency. They beat their contenders by a significant margin, thanks to their compact single-crystal structure. These panels can convert over 20% of sunlight into usable electricity, leading the pack in the solar energy world.

How long do monocrystalline solar panels last?

Monocrystalline solar panels often come with a 25-year warranty, and their useful life can extend to well over 30 years. This means that the slightly higher upfront monocrystalline solar cell price can be offset by the many decades of free electricity the panels will generate. Beware of seemingly cheap solar panels.
