## Overview

What is a mobile energy storage system?

Mobile energy storage systems (MESSs) can be self-mobile electric vehicles (vans, buses, or light-duty vehicles) or towable (semi-trailer trucks). During restoration purposes, MESS should be dispatched to the desired location (non-black start generator units locations).

How can mobile energy storage help your business?

Grid congestion creates increasingly long waiting times for companies who want to increase their grid connection. Mobile energy storage is the temporary solution to keep your business running. Municipalities and governments are tightening permit requirements to reduce CO<sub>2</sub>, NO<sub>x</sub> and noise emissions.

Is Alfen mobile energy storage sustainable?
