

Mobile Supplier of Photovoltaic Containers for Wastewater Treatment Plants

Overview

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a mobile water treatment & purification plant?

Mobile water treatment and purification plants are designed to cover emergency, temporary solutions such as construction sites or long-term water treatment requirements. These mobile systems are installed inside a seaworthy 20 or 40 ft containers or in combination to form complete systems with advanced water treatment and purification technologies.

What are mobile wastewater treatment and containerized sewage systems?

Mobile wastewater treatment and containerized sewage systems can be used in a very wide range of applications. They can be used for short term, mobile wastewater treatment where portable solutions are needed. But they can also be used for long term, fixed applications. They are specifically suited to applications such as:.

Where are mobile wastewater treatment plants assembled?

All mobile wastewater treatment plants are assembled in the PPU factory for customers. PPU is the original equipment manufacturer (OEM) for these container systems. They are assembled on the basis of the standard containers using pre-made parts lists for the respective application.
