

# **Myanmar solar container communication station Wind Power Approval Platform**

## Overview

---

Is solar energy a viable option for Myanmar's off-grid area?

For the off-grid area, Myanmar has mainly emphasis on solar home system and mini-grid system to be sustainable, affordable and environmental friendly. This paper aims to describe the high potential of solar energy, current situation of solar energy implementations and the important of Renewable Energy of Myanmar respectively.

Is solar energy a good option for Myanmar?

Among the renewable energy available, the potential of solar energy is one of the great interests in Myanmar. The government of Myanmar has set a plan to electrify the whole county in 2030. On the other hand, ASEAN has a target that is to increase 23% of Renewable Energy in ASEAN generation mix by 2025.

Why is solar power a key part of Myanmar's energy strategy?

Despite these challenges, the solar power initiative remains a crucial part of Myanmar's energy strategy. The junta has announced plans to develop 51 more solar projects, with a total capacity of 3,000 megawatts. If successful, these projects could significantly reduce the country's reliance on fossil fuels and help stabilize the energy sector.

Why is solar energy important for rural electrification in Myanmar?

Due to lack of water in summer season in Myanmar, Solar Energy will be a vital role in Electricity generation because of the high sunshine hours for that time. Therefore, the government of Myanmar is trying to increase the utilization of solar energy for the rural electrification.
