

# **Netherlands Energy Storage Power Supply Chassis**

## Overview

---

Where is the Netherlands' largest stand-alone battery energy storage system located?

Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS) in the port area of Dordrecht. The system will be used for grid stabilization by storing excess energy from renewable sources. The battery, consisting of 144 Fluence cubes will be located on a 6000m<sup>2</sup> site.

Why does the Netherlands need energy storage?

“As the Dutch energy transition efforts accelerate, the demand for flexibility is growing also. The challenges to our electricity grid have never been greater. Without adequate energy storage, the Netherlands risks increasing grid instability and security of supply risks,” Lion Storage said in its announcement.

What is a battery energy storage system (BESS)?

RWE has officially commissioned its first large-scale Battery Energy Storage System (BESS) in the Netherlands at the Eemshaven power station. With a total capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh), the system will be crucial in balancing the power supply and demand within the Dutch electricity grid.

What technologies are developing in the east of the Netherlands?

Focus on three key technologies that are already developing strongly in the east of the Netherlands: electrical energy engineering, electrochemical energy storage and sustainable drive systems. Smart energy Hub: Smart decentralised energy system that produces, stores and uses sustainable energy locally.
