

New Delhi Energy Storage Charging Station

Overview

How many charging stations are there in Delhi?

The 11 charging stations were launched as part of a larger project to establish 100 more charging stations across the city. The main aim behind it is to push the public to shift to EVs and make Delhi pollution free as well as the EV capital of India.

Why should India invest in a Bess storage facility?

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India and the world transition to clean energy. With an annual tariff nearly 55% lower than the previous benchmark, the project sets a new standard for BESS affordability in India.

How many liquid cooled batteries are being installed in Delhi?

Twelve liquid-cooled batteries are being installed, with nine already in place and the remainder expected to be installed shortly, Delhi's power distribution company BSES said, according to a report by news agency PTI. The batteries will be charged during off-peak hours and discharge during peak demand periods.

How geapp helped BSES Rajdhani Power Limited & BRPL?

GEAPP, in collaboration with IndiGrid and AmpereHour Energy, assisted BSES Rajdhani Power Limited (BRPL) in commissioning the 20 MW/40 MWh BESS project in New Delhi at a record-breaking 20-month delivery schedule.

New Delhi Energy Storage Charging Station
