Overview

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Is Asia-Pacific a key player in the energy transition?

The global shift toward clean energy is accelerating, with the Asia-Pacific region emerging as a key player in the energy transition. In recent years, countries across the region have rapidly expanded their deployment of renewable energy, particularly solar.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.
