

New energy and large-capacity energy storage facilities

Overview

What is the future of energy storage in China?

The new energy storage market in China has great development potential in the future. The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research White Paper 2025 released by the Institute of Engineering Thermophysics on 10 April.

What is new energy storage?

New energy storage refers to energy-storage technologies other than conventional pump storage. An energy-storage system charges when wind power or photovoltaic power generates a large volume of electricity or when the power consumption is low, and it discharges otherwise. China's operational efficiency of new energy storage continues to improve.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

New energy and large-capacity energy storage facilities

China targets 180GW of installed BESS capacity by 2027

Sep 17, 2025 · Solar inverter and energy storage system integrator-manufacturer Sungrow at the SNEC 2025 trade show in Shanghai, China, earlier this year. Image: Sungrow. China has ...

China National Energy Administration ...

Aug 3, 2025 · The China New Energy Storage Development Report 2025 represents a major milestone in the institutionalization of NES planning ...

INSIGHT: China new energy storage capacity ...

Apr 14, 2025 · The new energy storage market in China has great development potential in the future. The cumulative installed capacity of ...

New-type energy storage poised to fuel China's growth

1 day ago · China's installed capacity of new-type energy storage exceeded that of pumped storage for the first time at the end of 2024, according to a recent data release by China ...

New Energy Storage Capacity Surpasses Pumped Hydro for ...

Apr 24, 2025 · New Energy Storage Capacity Surpasses Pumped Hydro Storage! With the support of favorable policies, new energy storage is experiencing explosive growth, although ...

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

China leads the world in new-type energy storage capacity

Sep 11, 2025 · Technicians check equipment at an energy storage station in Yongzhou, central China's Hunan province. (Photo/Lei Zhongxiang) On a mountain pass in Jiawa village, Qusum ...
