

New energy storage unit in Bangkok

Overview

Rondo Energy and SCG Cleanergy have commenced operation of Southeast Asia's first industrial thermal battery energy storage system (BESS) at SCG's cement plant in Saraburi, Thailand. Are there grid-scale energy storage projects in Thailand?

There are currently few grid-scale energy storage projects in Thailand, although the situation is likely to change. In furtherance of its commitments under the Paris Agreement, the Thai government has enacted policies which envisage renewable energy accounting for the majority of grid capacity and output by 2040.

Is energy storage a new business model in Thailand?

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we expect to see greater penetration in this area. Notes Energy Policy and Planning Office, Ministry of Energy, electricity statistics.

Why is energy storage important in Thailand?

Energy storage systems, including batteries and pumped hydro storage, play a pivotal role in storing excess energy from renewable sources and releasing it when needed. Thailand has been investing in renewable energy projects, such as solar and wind farms, and energy storage is essential to manage intermittent power generation.

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.
