

# Niger Solar Energy Storage Containerized Grid-Connected Type

## Overview

---

Are there any off-grid solar energy systems in Niger?

Yes, there is considerable experience of off-grid solar energy systems in Niger. These include off-grid PV electrification, water pumping, and solar water heating systems. The main decentralised renewable energy system promoted in Niger for rural electricity is solar PV.

Will a 20 MW grid-connected solar PV system perform in Niger?

A financial analysis has been made as part of the pre-feasibility study of a 20 MW grid-connected solar PV system near Niamey, which provides a concrete example of how grid-based systems are likely to perform under the resource and macroeconomic conditions prevalent in Niger.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.
