

Nordic energy storage equipment announced

Overview

What is the biggest investment in energy storage in the Nordics?

In comments at the ceremony, Pourmokhtari said, 'It is a great honour to launch the largest investment in energy storage in the Nordics, with 211 MW of electricity currently connected to the grid. 'Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and increasing power generation.'

What are the emerging technologies in the Nordics?

Here are some of the emerging technologies in this transformation: Battery energy storage solutions (BESS) are expanding across the Nordics, starting from a low base, supported by significant price reductions in recent years. (See news of the first larger BESS debt financing in the Nordics.).

How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.
