

# **Off-grid solar-powered containerized mobile water plant in Saudi Arabia**

## Overview

---

Why is Saudi Arabia investing in green energy?

That is why Saudi Arabia has been investing in green energy sources to power its desalination plants. “Using renewable energies for desalination is crucial as it contributes to reducing the operation’s carbon footprint and water production costs,” Sultan Al-Rajhi, spokesperson for the Saudi Water Authority, told Arab News.

Who owns Jubail 3a water desalination plant?

ACWA Power and its partners Gulf Investment Corporation (GIC) and Al Bawani Water & Power Company (AWP) have inaugurated the Jubail 3A independent water desalination plant (Jazlah Water Desalination Company), the first of its kind in Saudi Arabia thanks to its integration with photovoltaic (PV) solar power.

Why does Saudi Arabia use solar panels?

The plant uses solar panels to help Saudi Arabia reduce its carbon emissions and transition towards clean, sustainable energy. Learn more about how Vision 2030 is actively protecting our most vital natural resources and using innovation to meet the Kingdom’s needs. of water desalinated.

How can Saudi Arabia develop climate-resilient infrastructure for sustainable desalination?

“To develop climate-resilient infrastructure for sustainable desalination, Saudi Arabia should prioritize innovative and renewable technologies,” Abdulaziz Daghestani, area sales director of water utilities and country director at Grundfos, told Arab News.

## Off-grid solar-powered containerized mobile water plant in Saudi Arabia
