

Outdoor base station wiring specifications and standards

Overview

What is a dib-r5 outdoor base station?

The DIB-R5 outdoor is a base station suitable for outdoor and indoor operation. The DIB-R5 outdoor has been developed for outdoor operation under harsh conditions and can be flexibly mounted providing radio coverage exactly where it is needed.

What are base station active antenna system standards?

Our latest “Recommendation on Base Station Active Antenna System Standards” provides the industry with an updated set of parameter definitions, measurement methodologies and reporting processes. This enables a uniform way to describe the electrical and mechanical characteristics of the network side of the radio link (the “base station antenna”).

How to check the power status of dib-r5 outdoor with connection board?

As the DIB-R5 outdoor with connection board IFB6 has no indication of the power status on the housing, the switch for connection to the IP transport network can be used to check the power status of the product. If the product has started up, the switch on site has to indicate an active network connection on the respective ports.

Does a base station need a disconnect device?

The base station has no integrated disconnect device so it need to be equipped with a disconnect device by installation. for PLUGGABLE EQUIPMENT, the socket-outlet shall be installed near to the equip-ment and shall be easily accessible, e.g. power supply source plug The base station is equipped with an internal FUSE (F8002) Rated 125V/5A.
