

Outdoor electric awning with its own power supply

Overview

Why should you buy an Electric patio awning?

Enjoy your outdoor at all times, even during the hottest hours. Fitted with a sun sensor, your electric awning closes or opens automatically to ensure that your terrace is always comfortable, both at lunch and during long summer evenings. Enjoy the benefits of smart patio awnings! Somfy motors makes awnings electrically operable.

What are Electric patio awnings made of?

The electric patio awnings are made using top-quality 100% Acrylic fabric with 6063-T5 grade aluminum cassette and arms. All Advaning patio awnings come with stainless steel components and high grade zinc/powder coatings to ensure durability for the long term.

What is a motorized awning?

With the touch of a button, you get effortless control over shade and sunlight, enhancing both comfort and energy efficiency. Motorized awnings powered by Somfy are designed to protect against harsh weather conditions, extend the lifespan of outdoor furniture, and create a more enjoyable and usable outdoor living area.

How does a motorized patio awning work?

Your motorized patio awning will adjust automatically to weather conditions thanks to sun and wind sensors. When the sun starts to beat down, the awning extends to keep your space cool. If the wind starts blowing, your electric awning retracts automatically.
