

Panama BIPV flat-plate solar tile supply

Overview

Can solar Innova be installed on a sloping roof?

Solar Innova photovoltaic tiles can be installed on sloping roofs, replacing conventional flat or curved tiles without the need to change battens. They are installed with a vertical overlap and using stainless steel self-tapping screws.

What are solar roof tiles?

Solar panels are designed more and more with their architectural integration in mind. Solar roof tiles are a perfect solution, since they constitute a range of active technological glasses that have the property of generating electrical energy and can be used both in newly built buildings and in renovations.

What is a photovoltaic module?

Each photovoltaic module consists of a set of electrically interconnected solar cells, encapsulated together with other materials that make the whole resistant to atmospheric conditions, with a robust design and easy to install. The following briefly summarizes the main stages of the manufacturing process:.

What is PVB encapsulant?

The PVB used as encapsulant meets the highest security requirements against breakage resistance offering a break of more than 20 N/mm². Welding ribbon is specially designed for manufacturing solar panels product. It is used for electrical connections between solar photovoltaics.
