

Paramaribo Folding Container High-Efficiency Type

Overview

What is a foldable cargo container?

A foldable cargo container looks like a traditional container, but it offers the opportunity of saving space when it's not being used. This type of container can be folded vertically and horizontally with the port's standard machinery and, of course, handled with container spreaders. Why do we need to save space in shipping cargo?

.

Why is a foldable container important?

The foldable container appears for one main reason: saving space. The logistics of returning empty containers after unloading their cargo to their origins has not been looked at from the point of view of economic savings and, as a consequence, an improvement of the environment. Approximately 40% of shipping cargo trips only carry empty containers.

Are foldable containers a win-win scenario?

So, the use of foldable containers looks like a win-win scenario. The space saving possibilities when empty containers are stored in this way are enormous. Space requirements for warehousing and logistics operators will be drastically reduced, as will container handling costs.

Will the SeaFold 40 reduce the cost of repositioning containers?

With over 20 percent of all ISO containers returning to their port of origin empty, the SeaFold 40' has the potential to cut the cost of repositioning containers by 56 percent, storage space by 80 percent, and carbon emissions by up to 70 percent.

Paramaribo Folding Container High-Efficiency Type

Folding Container House Manufacturer, Supplier, Factory
