

Philippines Cebu Energy Storage Fire Fighting System

Overview

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

Does Cebu need more power investments?

DOE Central Visayas Director Renante Sevilla lauded the BESS project in Mactan, saying that Cebu needs additional power investments given its rapid progress. / KOC.

Is a coal-fired power plant a good investment in the Visayas?

In the Visayas, coal-fired power plants such as AboitizPower's Therma Visayas Inc. (TVI) still contributes to the region's generation mix, helping maintain grid stability as renewable integration increases. According to the Department of Energy, the share of variable renewable energy like solar and wind could rise to as much as 28 percent by 2031.

How important is energy storage in 2031?

According to the Department of Energy, the share of variable renewable energy like solar and wind could rise to as much as 28 percent by 2031. In this context, energy storage systems like BESS will be essential for managing fluctuations and ensuring reliable delivery of power.
