

# **Phnom Penh Smart Photovoltaic Energy Storage Container Exchange**

## Overview

---

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

Can Cambodia push for a greener energy future?

“Cambodia has an opportunity to push for a greener energy future by requesting investment specifically in clean technologies like solar, battery storage, and closed-loop systems of pumped storage hydropower,” she said. So far, large-scale solar farm development has moved slowly in light of the country’s immense amount of untapped shine.

Does Cambodia have a solar generation regulation?

In 2018, Cambodia introduced a solar generation regulation, a new driver for the country’s solar PV system development. Cambodia’s grid-scale solar development started with just a 10 MW pilot in 2017.

How many solar power plants are there in Mekong?

Today, nine solar power plants are connected to the national grid and are capable of producing up to 444 megawatts (MW), according to the Stimson Center’s Mekong Infrastructure Tracker. That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned.
