## Overview

---

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

What are volt solar roof tiles?

Volt solar roof tiles generate clean energy while preserving your home's design. The system replaces traditional roof tiles with solar technology that sits within the roofline. The result is seamless integration without visible panels or bolt-ons. Understand Volt. Paired roof tiles. Partner with Volt to bring solar roof tiles to your projects.

Are solar tiles a good investment?
