

# Portable UPS power supply in West Africa

## Overview

---

How does a ups work?

UPS devices not only feed power to your devices like a conventional power bank but operate with very quick switching times, keeping a constant power supply, even when there is an unplanned power outage. UPS can protect against power surges, drops in line voltage, brownouts, blackouts, and other power supply issues. How long does a UPS stay powered?

.

What is a ups power bank?

A UPS power bank is also known as an Uninterruptible Power Supply device. During a blackout or load shedding, a UPS will automatically switch to battery power, and your device will stay ON and connected. UPS power banks keep computer systems, modems, and IT equipment safe from power surges too.

What is the energydock mobile ups?

The Energydock Mobile UPS provides portable power backup with a 3 kVA, 3.072 kWh lithium iron phosphate battery, Smart BMS, and built-in AC output, up to 4 hours of backup during outages.

Why should you use a ups power bank during a blackout?

During a blackout or load shedding, a UPS will automatically switch to battery power, and your device will stay ON and connected. UPS power banks keep computer systems, modems, and IT equipment safe from power surges too. UPS power banks are a cost-effective and reliable protection method.
