

Portugal container energy storage franchise fee

Overview

Should energy storage be democratised in Portugal?

Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year. However, this paradigm is about to change with the democratisation of energy storage solutions through wind and solar production.

Why is energy storage important in Portugal?

Renewable energies are inevitably vulnerable to variations in availability, since the sun and the wind cannot be programmed. Energy storage is therefore essential if EU targets are to be met. Portugal's installed energy storage capacity is still predominantly based on hydro pumping, which currently stands at 4,164 GW year.

How many GWh of electricity are generated in Portugal in 2023?

Between 1 January and 31 October 2023, 35,152 GWh of electricity were generated on the Portuguese mainland, of which 67.8 per cent came from renewable sources. The storage will be decisive for the long-awaited energy transition.

Why is it difficult to develop a resp in Portugal?

8.8 GW compared to 11.8 GW recorded in 2015. Although Portugal has been a pioneer in the enactment of specific storage regulations, the lack of injection capacity in the RESP, together with the uncertainty and delay in the publication of available capacity to obtain TRC, have made it difficult to develop in Portugal au

Portugal container energy storage franchise fee

The Portuguese legal framework on utility-scale energy storage

Feb 19, 2024 · This article briefly analyses the Portuguese regulatory framework for utility-scale energy storage technologies, in order to highlight the strategies that have been followed. A ...
