

Power distribution cabinet next to the base station

Overview

What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

What is a power distribution cabinet?

Simply put, a distribution cabinet is an enclosure that contains circuit breakers, relays, busbars, and monitoring devices. It ensures that electricity is delivered safely and efficiently to different sections of a building or facility. In electrical engineering, a power distribution cabinet refers to a centralized assembly that:
