

Power outage home backup solar container outdoor power

Overview

How long can a battery power a house during a power outage?

Capacity — the amount of energy a battery can store — is one of the main features that influence how long a battery can power a house during a power outage. Battery capacity is measured in kilowatt-hours (kWh) and can vary from as little as 1 kWh to 18 kWh.

How much solar & battery storage do I Need?

Whole home backup is possible, but it takes a large solar system with around 30 kWh of battery storage. Let's run through an example scenario of powering essential systems during a 24-hour power outage to get an idea of how much solar and battery capacity you'll need.

Why do solar panels need battery storage?

This is especially useful during prolonged power outages because unless you have battery storage, your solar system will be turned off by the local utility to prevent the backflow of electricity from injuring workers trying to repair the grid. But if you have battery storage, your system can operate independently when the grid is down.

Will solar power a house in 2025?

With the "One Big Beautiful Bill" signed into law, installing solar and/or battery storage in 2025 is homeowners' last chance to claim a 30% federal tax credit. Start your project today to lock in a 2025 installation date and your home's full savings potential. How long can a solar battery power a house?
