

# **Power supply for mobile charging cabinets in Latvia**

## Overview

---

Do I need an adapter to use a charger in Latvia?

Chargers for iPhones, Android phones and other smartphones or cell phones are usually dual voltage, so you can use them all over the world. However, it is possible you'll need an adapter to plug the charger into a Latvia outlet. Latvia uses electrical outlets and power plugs of types C & F (see images).

What type of plugs does Latvia use?

Latvia uses power outlets and plugs of types C & F. Take a look at the pictures below to see what these plugs and power sockets look like: Doesn't look familiar?

Do the outlets look different in your country?

You'll need a power plug adapter. Type C - The standard European plug.

Can I connect my laptop charger to an electrical outlet in Latvia?

Yes, you can connect your laptop charger to an electrical outlet in Latvia as long as the outlet is compatible with the charger's voltage and plug type. In Latvia, the standard voltage is 230V and the standard frequency is 50Hz.

Do I need a travel adapter in Latvia?

The electrical outlets and power plugs in Latvia are of types C & F (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. However, you may still need a voltage converter if the voltage is different.
