## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is the total system cost of mobile energy storage?

The total system cost of mobile energy storage is the same as that of fixed energy storage, including investment cost, operating cost, and recovery cost. Unlike mobile energy storage, which incurs transportation costs during energy transportation, fixed energy storage incurs line transportation costs during energy transportation.

What is mobile energy storage?

As a flexible energy storage solution, mobile energy storage also shows a trend of decreasing technical and economic parameters over time. Like fixed energy storage, the fixed operating costs, battery costs, and investment costs of mobile energy storage also decrease with the increase of years.

What is investment cost of energy storage system?

The investment cost of energy storage system is the unit power investment cost of energy storage system  $C_{inv}$ , the ratio of rated energy storage power  $P_{rate}$  to energy storage discharge capacity  $W_{disc}$ , and finally the investment cost of energy storage system in CNY/kWh units.
