## Overview

---

What is a polyester capacitor?

The polyester capacitor is referred to by other names apart from polyester. The trade name for the material used as the dielectric is Mylar, and they may also be referred to as PET capacitors because the synthetic polyester material used goes by this abbreviation. These capacitors are based around the use of a polyester dielectric.

Why should we use solar capacitor banks in solar photovoltaic power generation?

And other factors, so its short life and high cost. Therefore, the use of solar capacitor banks in solar photovoltaic power generation systems will make grid-connected power generation more feasible. Want to buy high-quality supercapacitors? Fill out the form and we'll get back to you ASAP.

Is photovoltaic power generation stronger than CSP?

Photovoltaic power generation is far stronger than CSP in terms of conversion efficiency, equipment cost and development prospects. Since the advent of practical polycrystalline silicon photovoltaic cells, the world has begun to use solar photovoltaic power generation.
