

Price quote for 20kW photovoltaic container used at Australian airports

Overview

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000-\$24,000, depending on component brands, installation complexity, and local incentives. How much does a 20kW Solar System cost in Australia?

The average 20kW solar system in Australia costs between \$19,000 and \$24,000, depending on the quality of components as well as the rebate and incentive eligibility.

What is a 20kW commercial solar PV system?

A 20kW commercial solar PV system is ideal for businesses with low to medium energy usage. Rising grid electricity prices make this an even more attractive option. Should you have sufficient roof space, a 20kW solar system can also be outfitted into larger residential homes to effectively boost savings while meeting their power needs.

Is a 20kW Solar System a good investment?

Great for businesses and organisations on the small to medium side, a 20kW solar system is best suited for commercial applications and deluxe residential units. A good quality 20kW system will deliver a full return on investment within 3 to 5 years, and you can begin earning savings immediately when you generate power from your solar.

How many solar panels does a 20kW Solar System use?

As technology continues to improve, the average solar panel efficiency (size vs. output) continues to improve. Depending on the solar panels, a 20kW solar system typically uses between 47 - 61 individual solar panels and requires a roof size of around 80m² - 104m² to accommodate them. How much energy can a 20kW solar system produce?

Price quote for 20kW photovoltaic container used at Australian airport
