

# **Price quote for grid-connected solar-powered containerized solar farms in Africa**

## Overview

---

What is the global containerized solar generators market?

On the basis storage capacity, the global containerized solar generators market is segmented into 10-40kWh, 40-80kWh, 80-150kWh and above 150kWh. Among this above 150kWh category is expected to dominate the containerized solar generators market owing to the widespread use of large storage capacity for the commercial purpose.

What is a containerized solar generator?

Containerized solar generators help to transform energy from sunlight into electricity. It can transform either directly from photovoltaic or by concentrated solar power or combination of both. Many industries have installed containerized solar generators into their grids to supply alternative energy to conventional energy.

What factors are expected to restrain the global containerized solar generators market?

The factor that is expected to restrain the growth of the global containerized solar generators market is it is very slow to charge battery storage. The fuel power generators can able to produce 10 times more power as compare to the containerized solar generators in the same interval of time.

Will India achieve 100GW of solar power?

In Mar 2018, The Indian government has set a target of achieving 100GW of solar power out of the total 175GW the country plans to produce from renewable sources. This announcement shows the demand for the containerized solar generator for the area which has a low density of sunlight.
