

# Procurement of 40kWh Smart Photovoltaic Energy Storage Container in Canada

## Overview

---

What is the largest battery storage procurement in Canada's history?

TORONTO – The Ontario government has concluded the largest battery storage procurement in Canada’s history and secured the necessary electricity generation to support the province’s growing population and economy through the end of the decade.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

What is the largest battery storage facility in Canada?

This includes the 390 MW Skyview 2 Battery Energy Storage System in the Township of Edwardsburgh Cardinal, which will be the largest single storage facility procured in Canada.

## Procurement of 40kWh Smart Photovoltaic Energy Storage Container

---

Market Snapshot: Energy storage in Canada ...

Release date: 2025-07-23 The installed capacity of energy storage larger than 1 MW--and connected to the grid--in Canada may increase from ...
