

# **Quotation for a 10MW Photovoltaic Container Project**

## Overview

---

Why should you buy a 10MW solar power plant?

As you settle the entire cost of the 10MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

What is a 10 MW solar power plant?

Imagine a vast area, typically the size of about 40 football fields, lined meticulously with rows of gleaming solar panels—this is what encompasses a 10 MW solar power plant. Such a facility is capable of producing enough electricity to power approximately 2,000 average homes, making it a significant contributor to local energy needs.

Can a 10MW solar power plant run a commercial establishment?

A 10MW solar power plant can run a commercial establishment independently from the Electricity grid. This size of solar farms takes up 49 to 50 acres of space and gives about 40000 kWh of low-cost electricity every day. Surplus power can subsequently be sold to the Electricity DISCOMs as per net metering mechanism of respective state government.

Do solar batteries increase the cost of a 10MW solar power plant?

The inclusion of solar batteries increases the 10MW solar power plant cost, although the advantages still outweigh the cost. With the reliance on solar batteries, your business can thrive in remote locations where grid accessibility is costly or unavailable.
