

# **Remote emergency communication command base station**

## Overview

---

What is emergency communication network?

The emergency communication network mainly includes two parts: ground Mesh network () and satellite portable station. Among them, the ground Mesh network is used to construct a local area network () covering the geological disaster site, and the satellite portable station is used to connect the local area network to the external public network.

Why do we need a post-disaster emergency communication network reconstruction system?

Because 72 h after the disaster is particularly important time period for rescue work (), it is necessary to design and develop a portable, easy to build, and stable post-disaster emergency communication network reconstruction system.

What is integrated satellite-ground emergency constructed-network technology solution after disaster (ISG-ECN)?

In this article, we propose an integrated satellite-ground emergency constructed-network technology solution after disaster (ISG-ECN). The emergency communication network mainly includes two parts: ground Mesh network () and satellite portable station.

How does a geological disaster affect the emergency communication network?

Particularly when a major geological disaster occurs, it will do harm to the existing mobile communication network, present additional difficulties to rescue work, and have a significant impact on the rescue work for the speed of reconstruction of the emergency communication network after the disaster ().

## Remote emergency communication command base station

---

### Rath Communications Base Station

Rath Communications 3200S Call CommanderA code compliant Area of Refuge System requires a central control point where the Call Boxes call for emergency assistance. The Call ...

---

### SmartRescue Base Stations (2500 Series)

4 days ago · A code-compliant two-way communication system for rescue assistance requires a central control point to manage emergency ...

---

### NAYA Wireless Intercom System

Naya wireless intercom AFDI-BS450 supports several base stations IP connected for remote command, to connect Fire Headquarters, Field Command and Frontline firemen for real-time ...
