Overview

What is a solar panel mount?

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.

How do you install solar panels on a roof?

To dig a little deeper, take a look at more information on installing solar panels on clay tile roofs, metal roofs, and flat surface roofs. Roof attachments are drilled into the roof and sometimes secured with flashing to protect against water. The module clamps attach the drilled-in roof attachments to the mounting rails.

What is a solar mounting system?

Modern solar mounting systems consist of roof attachments (with or without flashing), mounting rails, and module clamps. These products are designed to allow workers to quickly and effectively install solar panels that will last for decades on the roof, with minimal effect on the roofing materials and no roof leaks.

Should you install solar panel mounts on your roof?

By maintaining solar panel mounts diligently, homeowners can ensure the system's efficiency and prolong the life of both the mounts and the roof. The cost of solar panel mounting systems varies depending on several factors, including the roof type, mount materials, and installation complexity.
