

Rwanda Suifu container substation

Overview

How many substations are there in Rwanda?

The transmission system has also eleven 110kV substations, and four 70kV substations that supply all Country. According to the high energy demand the Rwandan generated electricity needs to be transmitted and distributed to the beneficiaries.

Why did Rwanda fund Rubavu port?

The Government of Rwanda funded the remaining 5%, showcasing its commitment to building resilient infrastructure to serve its citizens and foster regional integration. Rubavu Port is the first of four ports planned along Lake Kivu as part of Rwanda's National Strategy for Transformation.

How will Rubavu port transform Rwanda's transportation landscape?

Rubavu Port has been designed to transform Rwanda's transportation landscape. With a cargo handling capacity of 700,000 tons per year and the ability to accommodate two ships of up to 60 meters each, it is set to significantly reduce transportation costs, ease cargo and passenger movement, and facilitate cross-border trade.

How many kV transmission lines are there in Rwanda?

Currently, the Rwandan transmission system is composed of 370 km 110 kV and 70 kV lines linking the southern substation Mururu II to Gikondo as well as the 70 kV line from Jabana to Rwinkavu. The transmission system has also eleven 110kV substations, and four 70kV substations that supply all Country.
