

San Jose Solar Street Lights

Overview

What is a solar street light?

A solar street light is a raised lighting system powered by a photovoltaic (PV) module charging a battery that runs an LED luminaire at night. Modern systems are off-grid, smart-controlled, and designed to operate through low-sun periods. Pole/brackets & wiring, optional sensors/remote monitoring.

How do I choose the best solar street light?

This guide breaks down key factors like lumens, battery capacity, solar panel type, and installation requirements to help distributors, wholesalers, traders, and retailers choose high-quality products. To choose the best solar street light, consider lumens per watt efficiency, battery capacity, solar panel quality, and installation environment.

How to choose a solar-powered street lighting system?

Understanding the power consumption of a solar-powered street lighting system is the first step in determining the appropriate specifications. The total energy consumption depends on the wattage of the LED fixture and its operating hours per night. Higher-wattage lights require larger battery storage and solar panel capacity. 2.

Which solar street lights are available?

Our All-In-One Solar Street Light is available in the SIRIUS (INL-AIO9), GALAXY (INL-AIO6), ALIEN (INL-AIO5), and POLARIS (INL-AIO2) series. Utilizing the latest integrated design, the lithium battery, solar controller, and solar panel are all housed within the light casing.
