

Senegal s ultra-large capacity photovoltaic energy storage container

Overview

Will a photovoltaic power plant solve Africa's energy crisis?

This photovoltaic power plant project, which aims to address the energy emergency in Africa with sustainable solutions adapted to local needs, is expected to be commissioned in 2026, he announced. significant impact on the energy transition in Africa," he added.

Can photovoltaic solar be combined with a storage system?

Combining photovoltaic solar with a storage system is a unique solution to meet the current and future needs of the grid. In order to complement and intensify our local impact, Walo Storage is committed to : Build three mini-solar power stations to supply the pumping stations dedicated to farmers.

Will Voltalia provide a photovoltaic infrastructure for Senelec?

Voltalia, an international company specialising in renewable energies, will provide all the photovoltaic infrastructure required for the project. Its technology should ensure optimal integration and increased reliability of the plant on the Senelec national grid.

How will EnTech help the Senegalese national grid?

Its technology should ensure optimal integration and increased reliability of the plant on the Senelec national grid. Entech, an expert in energy conversion and storage systems, will deploy an innovative 80 MWh battery solution designed to strengthen the resilience of the national electricity grid. the Senegalese national grid.
