

# Seoul Electric Power Commercial Power Direct Supply Base Station

## Overview

---

Where is Seoul power station?

Seoul power station is an operating power station of at least 800-megawatts (MW) in Seoul, Gyeonggi-do, South Korea. The map below shows the exact location of the power station. Your browser is not compatible with Google Maps v3. Unit-level coordinates (WGS 84): CHP is an abbreviation for Combined Heat and Power.

How GE vernova & KEPCO will support South Korea's energy transition?

Order secured through KAPES, the joint venture between GE Vernova and Korea Electric Power Corporation (KEPCO). Advanced HVDC system, based on Line Commutated Converter (LCC) technology, aims for reliable and efficient power transmission and can support South Korea's energy transition by integrating renewable energy into the grid.

Will EP2 help South Korea's energy transition?

"Projects like EP2 are pivotal in enabling South Korea's energy transition," said Shailesh Mishra, Regional Leader of Grid Systems Integration in Asia Pacific at GE Vernova.
