

# Seychelles solar power generation system

## Overview

---

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What kind of electricity does Seychelles have?

The Seychelles have 220-240v electricity with British style B-1363 outlets, which will require both an adapter and in the case of appliances that can't handle 220v, a step down converter or transformer. What are the toilets like in the Seychelles?
