

Singapore Grid Energy Storage Company

Overview

What is Singapore's first utility-scale energy storage system?

Singapore's First Utility-scale Energy Storage System Through a partnership between EMA and SP Group, Singapore deployed its first utility-scale ESS at a substation in Oct 2020. It has a capacity of 2.4 megawatts (MW)/2.4 megawatt-hour (MWh), which is equivalent to powering more than 200 four-room HDB households a day.

Does Singapore need energy storage systems to manage solar intermittency?

However, the minister said there is a need to "step up energy storage systems to manage solar intermittency." Talks are currently ongoing with Sembcorp, the engineering conglomerate behind the 200MW/285MWh battery energy storage system (BESS) installation on Singapore's Jurong Island.

What is Singapore's solar energy system (ESS)?

Built across two sites on Jurong Island, our ESS enhances Singapore's grid resilience by mitigating the impact of solar intermittency as the republic progresses towards achieving its 2030 solar target of at least 2GWp and energy storage systems deployment of 200MWh beyond 2025.

What is accelerating energy storage for Singapore (ESS)?

For instance, the Accelerating Energy Storage for Singapore ("ACCESS") programme promotes use cases and business models with industry partners and other government agencies. The programme also helps to secure space, match demands and solutions, and facilitate regulatory approvals for ESS deployment.
